TOQIO, a B2B SaaS financial orchestration and configuration platform built for corporates with large merchant distribution networks, has partnered with Visa to provide payment technology to companies that do not otherwise offer financial services. Companies can use Toqio's platform to connect their distributors and merchant providers with financial institutions to provide greater liquidity. Toqio's clients will be able to access and issue Visa commercial cards directly from its platform.

Eduardo Prieto is Country Manager, Spain at Visa, prieto@visa.com, www.visa.com. Michael Galvin is Chief Partner Officer at Toqio, mike@toq.io, www.toqio.co.
